1 Hello World!

Hello World! Today I am learning LATEX. LATEX is a great program for writing math. I can write in line math such as $a^2+b^2=c^2$. I can also give equations their own space:

$$\gamma^2 + \theta^2 = \omega^2 \tag{1}$$

If I do not leave any blank lines \LaTeX will continue this text without making it into a new paragraph. Notice how there was no indentation in the text after equation (1). Also notice how even though I hit enter after that sentence and here $\downarrow \LaTeX$ formats the sentence without any break. Also look how it doesn't matter how many spaces I put between my words.

For a new essay I can leave a blank space in my code.

Let's type some crazy equations

$$\mathbf{E}(\mathbf{r},t) = \int_{\infty}^{\infty} dt'$$

Do you want to be a snowman? Or you want to be my friend?
